Re: Engineering/Web Design Internship

To whom it may concern:

I am writing in response to your internship opportunity for a Engineering/Web Development Intern as advertised on www.wrevel.com. I am a junior at Rensselaer Polytechnic Institute in Troy, NY with a dual major in Computer Science and Cognitive Science. Through my studies I have come to know that the future of technology will allow seamless interaction between Man and Machine, but to design technology in such a way demands an insight into the fundamental workings of the mind.

I feel that the combination of my educational experience and passion to innovate qualify me for this position. My skills include Mac OSX, C, C++, Python, Java, and much more. I have a great deal of experience of delivering concise, well documented solutions to challenging problems, and formulating well executed strategies in team environments.

The details of my background appear in the resume provided with this letter, and examples of projects I have worked on can be seen at www.ianoboyle.com/portfolio.php. I look forward to learning more about this opportunity.

Sincerely,

Ian O'Boyle
